

Heidi Simon | XpressCash Services: Merchant Accounts for Credit Card Processing

“Saving You Time & Money on All of Your Credit Card Processing Needs”

It is our job to help you **save time and money** on all of your processing needs.

New businesses are provided with all the tools necessary to accept credit cards including their terminal (or gateway if they are web based) and their merchant accounts for all of the major card types.

And businesses that are **already accepting credit card payments** receive a **complimentary evaluation** of their current statements. We will show you how we can save you money each month by **lowering your processing fees**.

What sets us apart from other merchant service providers, besides **saving our customers money each month**, is our **customer support**. Along with access to 24/7 customer and technical service lines, our **customers have a personal point of contact** which is very rare in our industry.

Call us today to get setup...or for a **free analysis** ... you'll be happy you did!
